

Family biographies show the diversity of Europe

A project carried out by the students of Karolinen-Gymnasium in Rosenheim, under the supervision of Winfried Adam.

Europe thrives on the diversity of its regions, languages and countries. Throughout European history, borders and people have kept moving, as clearly shown by the family biographies of the students of our school, Karolinen-Gymnasium of Rosenheim in Bavaria, Germany. The map gives information on the places of origin of our students' parents and grandparents. What emerges is a network that stretches across regions and countries on the European continent.
